SUMMARY

Data Science undergraduate with hands-on experience building AI-powered and full-stack applications using Python, Java, TypeScript, FastAPI, Spring Boot, React, and modern LLM technologies. Experienced in developing intelligent systems involving semantic search, resume analysis, NLP, and automation workflows. Strong foundation in software engineering, API development, database design, and machine learning. Passionate about building practical AI products, experimenting with emerging technologies, and delivering scalable solutions to real-world problems.

EDUCATION

BSc (Hons) in Data Science

2024 – Present

Sri Lanka Institute of Information Technology (SLIIT)

GCE Advanced Level (Physical Science)

2019 – 2022

Kingswood College Kandy

PROJECTS

RecruitAI – Enterprise AI-Powered CV Matching & Auditing Platform

Feb 2026 – Apr 2026

Stack: Java, Spring Boot, FastAPI, MySQL, SentenceTransformers, Scikit-learn, Gemini API

[View Code](#)

- Designed and developed a decoupled dual-service microservice platform for enterprise resume parsing and candidate ranking.
- Integrated multi-modal CV parsing utilizing PyPDF2 and Tesseract OCR mapped to structured JSON via Google Gemini API.
- Implemented semantic skill matching and vector cosine similarity scoring using local SentenceTransformers.
- Built an algorithmic fairness engine auditing demographic parity across 12 protected traits using synthetic mutations.

Kidney Disease Identification System

Sept 2025 – Oct 2025

Stack: Python, Scikit-learn, Pandas, NumPy

[View Code](#)

- Performed exploratory data analysis, feature preprocessing, and missing-value handling on healthcare datasets.
- Trained and evaluated classification models using Scikit-learn to predict chronic kidney disease outcomes.
- Assessed model performance using accuracy, precision, recall, and F1-score metrics.

Web-Based Fashion Store

Feb 2025 – May 2025

Stack: MySQL, SpringBoot, HTML, Java, CSS

[View Code](#)

- Developed a full-stack e-commerce marketplace featuring product catalog browsing, dynamic filtering, shopping cart, and wishlist functions.
- Built a secure customer authentication flow with role-based routing and an interactive admin dashboard for stock tracking and inventory CRUD operations.
- Integrated payment processor sandboxes for checkout, along with automatic email notifications for order confirmations.
- Integrated an AI-powered chatbot for product recommendations, customer assistance, and user engagement.

HD Resorts – Travel Discovery & Booking Companion

Aug 2025 – Oct 2025

Stack: React Native, Expo, Node.js, Express.js, MongoDB, Cloudinary

[View Code](#)

- Built a cross-platform progressive web app (PWA) and mobile client utilizing Expo Router for navigation and role-based route guards.
- Developed a modular REST API using Express.js and MongoDB Atlas with security authentication via JSON Web Tokens (JWT).
- Integrated Cloudinary for dynamic multipart form file uploads of listings, user profile photos, and review images.
- Implemented rating/review systems and custom map points for tourist attraction discovery across Sri Lanka.

TECHNICAL SKILLS

AI & Automation	LLM Integration, Prompt Engineering, RAG, Semantic Search, Vector Embeddings, OCR Pipelines, Bias Auditing
Full-Stack Dev	FastAPI, Spring Boot, Node.js, Express.js, React, React Native, REST APIs, JWT Authentication
Machine Learning	Scikit-learn, NLP, Classification, Regression, Model Evaluation, SentenceTransformers
Data Science	Pandas, NumPy, EDA, Feature Engineering, Data Preprocessing
Programming	Python, JavaScript, TypeScript, Java, SQL, R, C
Databases	PostgreSQL, MySQL, MongoDB(Cloud/Local)
Tools & Practices	Git, GitHub, Postman, Linux, Docker (basic), VS Code, IntelliJ IDEA, PyCharm

EXPERIENCE

Freelance Full Stack Developer

2024 – Present

Self-Employed

- Delivered custom web applications end-to-end for clients — from requirements gathering and architecture through deployment and post-launch support.
- Built and iterated on frontend interfaces and backend logic based on client feedback, maintaining clean, maintainable codebases across projects.
- Managed version control, timelines, and written communication independently, mirroring the ownership expected in a startup engineering environment.

CERTIFICATIONS

- Introduction to Data Science – Cisco Academy
- Pandas, Data Visualization – Kaggle Learn
- AI/ML Engineer stage 1 and 2 – SLIIT

SOFT SKILLS

- **Professional:** Problem Solving, Analytical Thinking, Effective Communication, Team Collaboration
- **Work Ethic:** Time Management, Quick Adaptability, Self-Learning Ability, Attention to Detail
